"We Could Sell Cheaper Tools, But We Won't"
"We Would Sell Better Tools, But They're Not Made"

H. GOLDBLATT TOOL COMPANY
Kansas City, Missouri

**THIS
PLASTERER SAYS.**

THE MANNER IN WHICH
YOUR **GOLDBLATT TROWEL**
IS BALANCED AND THE
FLEXIBILITY OF THE BLADE
MAKES MY WORK FEEL MORE
LIKE PLAY THAN
LABOR.

**TO OUR
PATRONS**

Our aim and object in putting forth this Descriptive Catalogue of our full line of Tools is to intelligently present, illustrate and describe to the Mechanic the difference in Quality and Price of each tool.

We take pleasure in directing your attention to our number of new tools which we have added.

When buying tools from us, you get those which have been thoroughly tested, and known to be the best of their kind.

Energy, strict attention to the wants of our customers, and our extended experience enable us to know just what the requirements of the trade are. It also enables us to fill your orders in satisfactory manner, with such tools as are needed and cannot be supplied elsewhere.

To those who have not favored us with their business, we ask but a trial order. We know that we can and will make a customer of you if but given a chance.

We thank our many patrons for their liberal orders in the past, and assure them that we shall endeavor earnestly to deserve their further favors.

Very respectfully,

H. GOLDBLATT TOOL CO.

HOW TO ORDER

Write name and address plainly. Always give catalogue number of each tool wanted.

**POSITIVELY NO GOODS
SENT C. O. D.**

HOW TO SEND MONEY

Remittances should be made by Postoffice or Express Money Order, or by Bank Draft. Do not send personal checks, as the banks charge exchange. If you send cash we suggest you register the letter.

ADDRESS ALL ORDERS

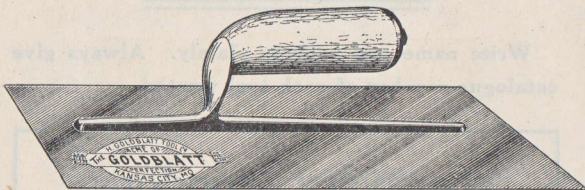

and Make All Remittances to

H. GOLDBLATT TOOL CO.

**213 E. 15th Street,
KANSAS CITY, MO.**

The day we receive your order we immediately mail you a card acknowledging receipt of your order, and advise you how we are shipping your tools, over what Railroad, express company, or whether by parcel post.

Plasterers' Trowels The Goldblatt

No. 1G—Finishing Trowel, made of 24-gauge **best trowel steel**, highly polished and etched; mounting extends within one inch of each end of blade and contains **ten large rivets**. This leaves plenty of spring for finishing; also prevents lime from working between blade and mounting. Our Handles are shaped so as to fit your hand, and the Trowel is balanced so as to please the most particular mechanic.

Made in the following sizes: 11 inches, 11½ inches, 12 inches.

Price each, any size.....\$2.00

We are the originators of this pattern of Plastering Trowel. Every good Plasterer uses the Goldblatt Trowel.

No. 2G—Browning Trowel, for rough coating, made of 22-gauge **best trowel steel**, highly polished and etched; mounting extends within a half inch of each end of blade, and contains **twelve large rivets**. Otherwise the same as No. 1G.

Made in same sizes as the No. 1G.

Price each, any size.....\$2.00

Marshalltown Plastering Trowels, any size, \$2.00

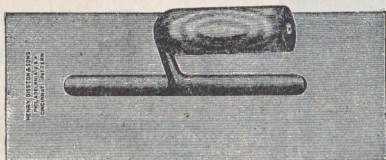

We make low, medium and high mounts in all of above Trowels. By this we mean the space between the upper side of mounting and the under side of handle. As a rule, a plasterer with a small hand wants a low mount, one with a medium size hand wants a medium mount and one with a large hand wants a high mount. If above is not specified in order, we always ship Trowels **medium mounts**, and when sizes are not specified we always ship 11½-inch.

**You should not fail to read testimonials
on page 47 of this catalog.**

Don't forget—It's your Confidence we want

Think of our Low Prices and our High Quality

Plasterers' Trowels Woodrough & McParlin

No. 1 K. C.—Plastering or Cement Sidewalk Trowel, made of light or extra light 24-gauge **best trowel steel**, highly polished and etched; mounting contains five rivets. On account of the extreme flexibility of the blade this Trowel is best adapted for cement sidewalk work, and we especially recommend it for that use. The best workmen everywhere are using them.

Made in the following sizes:

10½-in.	11-in.	11½-in.	12-in.
Price each, any size.....\$1.25			

Extra Trowel Blades

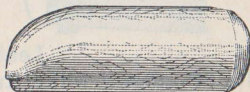

We sell Trowel Blades without holes punched in them. Same quality of Blade that we use in our \$2.00 Plastering Trowel. Any size up to 12 inches.

Price each.....50c

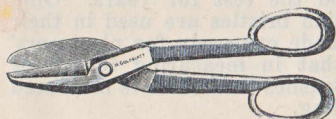

Extra Trowel Handles

Same Handle as used on our \$2.00 Plastering Trowel.

Price each.....10c

Plasterers' Snips

We pay postage and deliver to your door by the mail man

Plasterers' Aluminum Hawks

NOTICE
THE
EXTRA LOW
PRICES.

OUR
ALUMINUM
HAWKS ARE
KNOWN ALL
OVER THE
COUNTRY.

SEE
LOW
PRICES.

SEE
LOW
PRICES.

Aluminum Hawks are far superior to Wooden Hawks. They are the cheapest in the long run. The vast quantities of Aluminum Hawks which we have sold in the last few years plainly indicates the fact that the plasterers are now using them in preference to the Wood Hawks.

Our Aluminum Hawks are made of very hard cold rolled aluminum $\frac{3}{8}$ inches thick. They are lighter in weight than Wood Hawks. The handles are detachable with a 4-inch flange with a hub extending $\frac{7}{8}$ of an inch to receive thread on handle. This flange makes the Hawk very strong and durable.

Plasterers' Wood Darbies

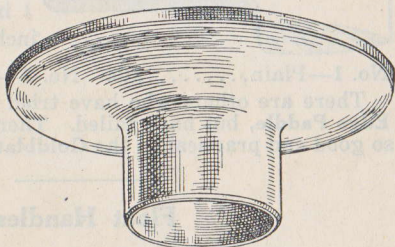

44 inches long, 3¾ inches wide, ½-inch thick.
Round handle 4 inches long, rib 18 inches long.
No. 2W—Price, each.....60c
Made of selected Soft White Pine.

What we make is the very best and that is Goldblatt
quality

Plasterers' Callous Preventer

Will Fit on Aluminum or Wood Hawks.

Made from a very
fine white gum
rubber. Soft and
easy to your
hand.

With the use of this rubber flange on your Hawk, we
guarantee that your callouses will disappear and your
hands will remain clear from callouses.

This rubber callous preventer which we have just in-
troduced to the plasterers in the last year has turned
out to be one of our best and biggest selling items, be-
cause it is appreciated by every good mechanic who
takes pride in the appearance of his hands. After you
have one of these Callous Preventers you will thank us
for calling your attention to this article.

No. 3. Price, each.....40c

Plasterers' Wood Hawks

Made of selected
soft white pine.

Width of dovetail
5 inch; length of
handle 6 inch;
weight approxi-
mately 1¾ pounds.

Plasterers' Cork Floats

Handled

Our Acme reinforced Float is the best thing of its kind ever produced.

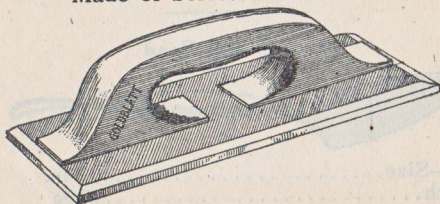

The cork, which is of the very best quality, is attached to a piece of soft pine. The handle is fastened to the wood side of cork, leaving the face of cork as true, square and smooth as possible to make it.

It is for the mechanic who appreciates a good tool.

Plasterers' Level—Wood

This level has two plumb glasses and two level glasses. It works either end or edge up. All four spirit glasses or vials are protected by glass coverings. This prevents plaster, water or dust from getting around spirit glasses. It's a level that meets with approval from every good plasterer, as it is made according to their ideas. Made in lengths of 18 and 20 inches.

No. P5—Each.\$1.50

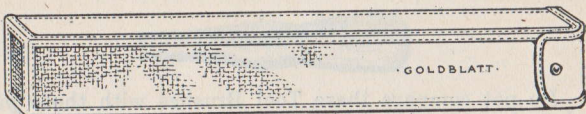

Plasterers' Level—Aluminum

This Aluminum Level is built exactly the same as the Wood Levels shown above, as far as the manner in which the level and plumb glasses are set and protected. Has two levels and two plumbs. Works either end or edge up. This Level is 18 inches long. Weighs 1 $\frac{3}{4}$ pounds.

No. P7—Each.\$3.50

Level Cover or Case

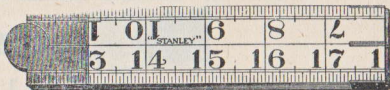

Will fit Wood or Aluminum Levels. Made of best quality brown color canvas. Has leather corners. Well worth the money you spend on one if you like to take good care of your level. When ordering state whether you want case for an 18 or 20-inch Level.

No. 5—Price.50c

Blindman's Rule

Two feet
Four fold

This rule is made for use by persons with poor eye sight or when working in poorly lighted places.

No. 7—1 $\frac{3}{8}$ inches wide, each.50c

Laugh and the world laughs with you; frown and you'll wrinkle your face

Plasterers' Saw

A Real Plasterers' Saw—not a carpenters' or Farmers' Saw. Read Description.

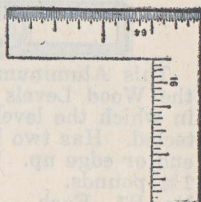

This Saw is made especially for Plasterers' use. It has coarse teeth with a good set, which means easy sailing through staff work or any other work for which a Plasterer uses a saw. The length of blade is 20 inches. The entire length of Saw is 24 inches.

No. P8—Each.....\$1.00

Plasterers' Squares

No. 12—Body is 12x1½ inches. Tongue is 8x1 inches. Marked in 1/16, 1/12, 1/8, 1/4. Made of steel and polished.

Aluminum Line Level

The "Goldblatt Line Level" consists of an accurate, proved level glass placed in a three-inch aluminum tube with "spring German silver" end pieces and hooks formed from one piece of metal. The end pieces are attached to the tube by German silver rivets that pass through the tube and through lugs at top and bottom between the hooks and the center of the level, thus preventing the hooks from pulling out of alignment in case of severe strain or rough usage.

Every level is carefully tested and proved and is guaranteed to be accurate.

Every plasterer, bricklayer or cement worker

should have one of these little tools in his outfit. They weigh only one-half ounce and take up about the same space as a fountain pen if carried in the pocket. The uses to which they can be put are almost as many as those of the old style wood level. They take the place of a straight edge and level and do the work more accurately.

We deliver any of the above Bags to your door by Parcel Post

Do you know why we are imitated?

Plasterers' Tile Markers New Style

For Imitation Tile Work

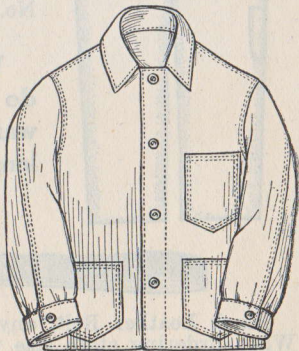

This tool is used to mark off imitation tile on plastering, in bath rooms and kitchens. It not only makes an impression, but when tool is used at an angle, it cuts out the crease, and cuts it smooth, which makes the crease look identically like the spacing between tile brick. The size of the crease can be made small or large, depending on the amount of pressure put on the tool by the workman. The tool is of such shape which makes it possible to get it into any angle or corner. It is made of high grade tool steel and highly tempered. Length of cutting part, 3 inches from tip to tip; entire length of tool is 7 inches. **Our Tile Marker is the most practical and positively the best tool made for this purpose, and the best plasterers all over the country know this.**

No. T3—Price, each.....40c

Plasterers' and Masons' Work Jackets Union Made

This Jacket is made of same white goods that our Goldblatt Overalls are made of. They have three pockets, and well made in every respect. Sizes 36 to 44. When ordering give size of breast measurement.

No. 565—Price60c

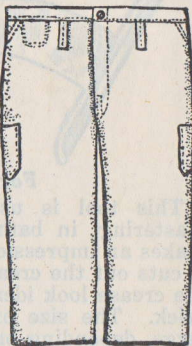

We pay the postage and deliver to your door free of charge

Plasterers' and Masons' Working Garments

Goldblatt Union Made Overalls without Bib—Low price of.60c

This is our Special Plasterers' Overalls without bib. They have five belt loops around waist line. These Overalls are made purposely for those plasterers who do not like Bib Overalls, and who prefer to use a belt instead of suspenders. They have two hip or back pockets, two small ones on the side of legs for pointing trowel and other small tools, and a watch pocket on inside of waist line. They are made of best quality white Overall Goods and are well made. All sizes.

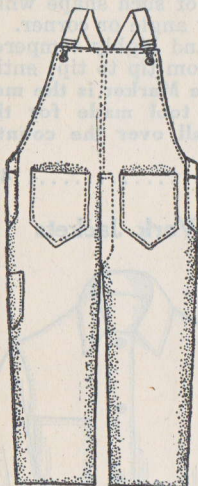

No. 567—Price, per pair...60c

Goldblatt Union Made Overalls —with Bib

This is our regular Bib Overall. They have two pockets in front, one in the back, one small one on the side, and a 2-inch loop on the back to hold a trowel or hammer, etc. Otherwise same as above.

No. 566—Price, per pair....65c

When ordering Overalls do not fail to state sizes wanted. Give waist and length measurement.

Belts

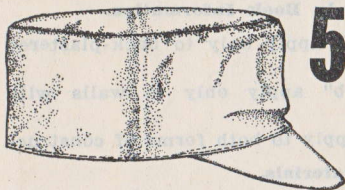

Black Leather Belt, any size from 30 to 44 inches. When ordering state size wanted.

Price each.....40c

You have no transportation charges to pay. We pay it at our end of the line.

Plasterers' and Masons' Working Garments

Caps
A 20c Cap for

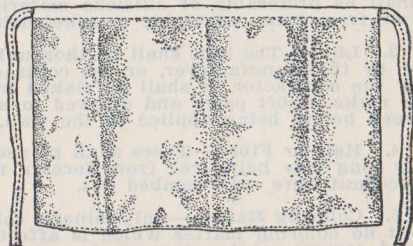

5c

Our advertisement appears on the cap, but this is why we sell them for only 5c. The Caps cost us more than the price we sell them for. They are made of a fine quality white

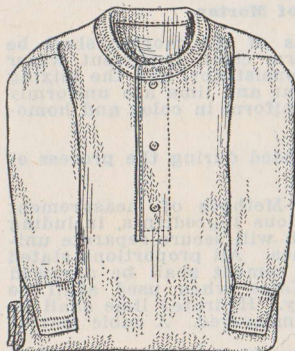

material and are lined. Most all advertising Caps are not lined. Our Cap being lined prevents the mortar and plaster dust from getting into your hair. Made with a white bill, and they are sized correctly. When ordering state size wanted.

Aprons

This Apron is used principally by plasterers. It prevents the mud from getting into pockets. These Aprons are made of same white goods that our Overalls are made

of. They are 30 inches wide, 18 inches high and have two strong 24-inch bands attached. Price each.....15c

Plasterers' Work Shirts

Lightweight Balbriggan Undershirts. Made from selected cotton. Strongly reinforced throughout; cream color; long sleeves. Be sure to state size wanted.

No. 570—Price Each..25c

Heavy elastic ribbed, slightly fleece lined Undershirts. Used in cold weather. Cream color; long sleeves. Be sure to state size wanted.

No. 571—Price each..50c

We ship Tools all over the United States and Canada

Exterior Plastering Specifications

Our Useful Handy Book Information.

Paragraphs marked "a" apply only to back-plastered walls without sheathing.

Paragraphs marked "b" apply only to walls with sheathing.

All other paragraphs apply to both forms of construction.

Materials.

1. Cement.—The cement shall meet the requirements of the Standard Specifications for Portland Cement of the American Society for Testing Materials. (Standard No. 1, Association of American Portland Cement Manufacturers.)

2. Fine aggregate shall consist of sand, crushed stone, or gravel screenings, graded from fine to coarse, passing when dry a screen having one-eighth inch diameter holes, shall be preferably of silicious materials, clean, coarse, free from loam, vegetable or other deleterious matter.

3. Lime.—The lime shall be thoroughly hydrated either by the manufacturer, or the contractor. If hydrated by the contractor, it shall be slaked in sufficient water to make a soft paste and allowed to stand at least one week before being applied to the wall.

4. Hair or Fibre.—There shall be used only first quality long cow hair, free from foreign matter, or a long cocoanut fibre well combed out.

5. Coloring Matter.—Only mineral colors shall be used, but no coloring matter which is affected by lime, Portland cement or the elements is permissible.

6. Water shall be clean, free from oil, acid, strong alkalies or vegetable matter.

Preparation of Mortar.

7. Mixing.—The ingredients of the mortar shall be thoroughly mixed to a uniform color, sufficient water added to obtain the desired consistency, and the mixing shall continue until the cement and lime are uniformly distributed and the mass is uniform in color and homogeneous.

The hair or fibre shall be added during the process of wet mixing.

8. Measuring Proportions.—Methods of measurement of the proportions of the various ingredients, including the water, shall be used which will secure separate uniform measurements at all times. All proportions stated are by volume. A barrel of cement shall be assumed to contain 3.8 cubic feet. Lime when used shall be measured in the form of putty. Hydrated lime shall be made into putty before being measured. A cubic foot of

Exterior Plastering Specifications

Continued

lime putty contains .31 cubic feet of hydrated lime weighing 45 pounds and .69 cubic feet of water weighs 43 pounds.

9. Quantity.—There shall not be mixed at one time more mortar than will be used within one hour. Mortar which has begun to stiffen or take on its initial set shall not be used.

10. Hand Mixing.—The mixing shall be done on a water-tight platform and the materials shall be turned until they are homogeneous in appearance and color.

11. Consistency.—The materials shall be mixed so as to provide sufficient water to insure a proper bonding and a dense mortar free from voids.

12. Retempering.—Retempering mortar, i. e., remixing with water after it has partially set, shall not be allowed.

Mortar Coats.

23. Plaster.—(a) The first coat shall contain not more than two and one-half ($2\frac{1}{2}$) parts of sand to one (1) part of Portland cement by volume. If lime putty is added, it shall not be in excess of one-third ($\frac{1}{3}$) of the volume of cement. Hair or fibre may be added in sufficient quantity to bond the mortar.

(b) The first coat shall contain not more than two and one-half ($2\frac{1}{2}$) parts of sand to one (1) part of Portland cement by volume. If lime putty is added it shall not be in excess of one-third ($\frac{1}{3}$) of the volume of cement. No hair, fibre or similar material of any kind or in any quantity shall be added to the mortar.

For second coat, the proportion of sand to cement shall not be greater than $2\frac{1}{2}$ to 1 by volume, nor shall more than one-third part of lime putty be added.

For third coat, the proportion of sand to cement shall not be less than $2\frac{1}{2}$ to 1, by volume, nor shall more than one-third part of lime putty be added.

24. Waterproofing.—When a special waterproofing is to be added to mortar for stucco work, it shall be added in strict accordance with the specifications of the manufacturer. Lime should be omitted in the coat in which waterproofing may be used.

25. Application.—The plastering should be carried on continuously in one general direction, without allowing the plaster to dry at the edge. If it is impossible to work the full width of the wall at one time, the joint should be at some natural division of the surface, such as a window or door.

Ask any banker or trust company as to our responsibility

Exterior Plastering Specifications

Continued

(a) The first coat shall be applied to the outside of the lath and pushed through sufficiently to give a good key. Over the face of the studs the plaster shall be forced well through the lath in order to fill entirely the space between the lath and the stud. The backing coat shall be applied to the back of the lath and shall be thoroughly troweled so that the lath shall be entirely covered. The final coat shall be applied to the face of the first coat.

(b) The first coat shall be applied to the lath and thoroughly pushed through against the inside waterproofing so as to completely imbed the metal of the lath on both sides. Special care shall be taken to fill all voids around furring strips and where lath laps.

26. Roughing.—Soon after applying and before the initial set has taken place, the surface of the coats which are to receive succeeding coats shall be roughened with a saw-toothed paddle or other suitable device.

27. Dampening.—Before applying mortar the surface of the preceding coat shall be thoroughly wetted to prevent absorption of water from the fresh mortar.

28. Thickness of Coat.—(a) The first coat shall be at least $\frac{3}{8}$ -inch thick over the face of the lath and project through behind the lath about $\frac{3}{8}$ -inch. The backing coat shall increase the thickness behind the lath to not less than $\frac{5}{8}$ -inch. The final coat shall be not less than $\frac{3}{8}$ -inch thick.

(b) The first coat shall have a minimum thickness over the lath at any point of not less than $\frac{1}{4}$ -inch. The intermediate coat shall have a thickness of not less than $\frac{1}{4}$ -inch or more than $\frac{3}{8}$ -inch. The final coat shall have a thickness of $\frac{1}{4}$ -inch when placed over an intermediate coat, or of $\frac{3}{8}$ -inch when placed directly on the scratch coat.

29. Drying Out.—The final coat shall not be permitted to dry out rapidly and adequate precaution shall be taken, either by sprinkling frequently after the mortar has set hard enough to permit it or by hanging wet burlap or other material over the surface.

30. Freezing.—Stucco should never be applied when the temperature is below freezing.

Finish.

31. Smooth Troweled.—The finishing coat shall be troweled smooth with a metal trowel with as little rubbing as possible.

32. Stippled.—The finishing coat shall be troweled smooth with a metal trowel with as little rubbing as

If our tools are not what you expected when you receive them, then we don't want you to keep them

Exterior Plastering Specifications

Continued

possible, and then shall be lightly patted with one of our No. 40 or 41 Dash Brooms to give an even, stippled surface.

33. Sand Floated.—The finishing coat, after being brought to a smooth, even surface, shall be rubbed with a circular motion of a wood float with the addition of a little sand to slightly roughen the surface. This floating shall be done when the mortar has partially set.

34. Sand Sprayed.—After the finishing coat has been brought to an even surface, it shall be sprayed with one of our number 43 or 44 Dash Brushes—dipped into a creamy mixture of equal parts of cement and sand, mixed fresh every 30 minutes and kept well stirred in the bucket by means of the Dash Brush. This coating shall be thrown forcibly against the surface to be finished. This treatment shall be applied while the finishing coat is still moist and before it has attained its final set, i. e., within 3 to 5 hours. To obtain lighter shades add hydrated lime of 5 to 15 per cent of the volume of the cement.

35. Splatter Dash or Rough Cast.—After the finishing coat has been brought to a smooth, even surface and before attaining final set, it shall be uniformly coated with a mixture of one part cement and two parts of sand thrown forcibly against it with our No. 44 Dash Brush to produce a rough surface of uniform texture when viewed from a distance of 20 feet. Special care shall be taken to prevent the rapid drying out of this finish.

36. Pebble Dash.—After the finishing coat has been brought to a smooth, even surface, and before attaining initial set, clean round pebbles or other material as selected, not smaller than $\frac{1}{4}$ -inch or larger than $\frac{3}{4}$ -inch, previously wetted, shall be thrown forcibly against the mortar with our No. 42 Dash Brush so as to embed themselves in the fresh mortar. They shall be distributed uniformly over the surface of the final coat and may be pushed back into the mortar with a clean wood trowel, but no rubbing of the surface shall be done after the pebbles are embedded.

38. Mortar Colors.—When it is required that any of the above finishes shall be made with colored mortar, not more than 6 per cent of the weight of Portland cement shall be added to the mortar in the form of finely ground coloring matter.

A predetermined weight of color shall be added dry to each batch of dry fine aggregate before the cement is added. The color and fine aggregate shall be mixed together and then the cement and lime mixed in. The whole shall then be thoroughly mixed dry by shoveling from one pile to another through a $\frac{1}{4}$ -inch mesh wire screen until the entire batch is of uniform color. Water shall then be added to bring the mortar to a proper plastering consistency.

Brick and Stone Masons' Tools

Brick Hammers

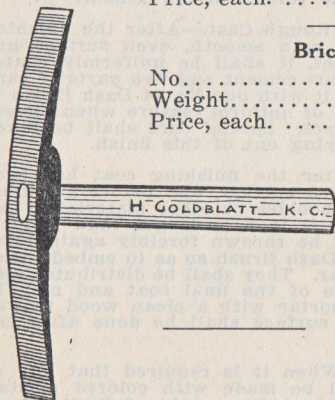

Our Hammers and Scutches are hand made, and are made of high grade hammer steel. We use only second growth hickory handles. They are well balanced and shaped to please you.

Brick Layers' Finger Tape

White Color—Non-Poisonous

This tape is used by bricklayers and masons to wrap around their fingers, protecting them from getting sore. The Tape is a white color, 1½ inches wide; each roll weighs 6 ounces. Every roll comes wrapped in tinfoil and paste-board box, which keeps the Tape fresh and in good condition. Don't compare our Tape with ordinary

cheap electrical Tape, which is commonly sold as Bricklayers' Tape. Our Tape is made purposely for bricklayers' use, and is very adhesive. We guarantee it to stick on your fingers.

No. 500—Price, per roll.....**.25c**
 No. 500—Price per dozen rolls.....**\$2.50**

Tool Bags With Leather Bottoms.

This satchel is made of 18-ounce white canvas, sewed with best linen thread on a hot-wax, lock-stitch machine, cannot rip unless every stitch is cut; made with a heavy 12-gauge steel frame, hand-made; genuine russet leather handles, buckle pieces with plated buckles. The bottom is made of good quality leather, running five inches up the sides. The bottom

is lined with waterproof, 20-point board, inside of board covered with 10-ounce gray canvas. The handles, billets and buckle pieces are riveted to frame by hand. Each bag has an inside pocket for small tools. Has lock and key and two straps as shown at top of bag.

Bottom rests on five metal studs when placed on surface. It can be carried through the streets and in public places, looking as well as a traveling bag.

Masons' Levels or Plumb Rules—Aluminum

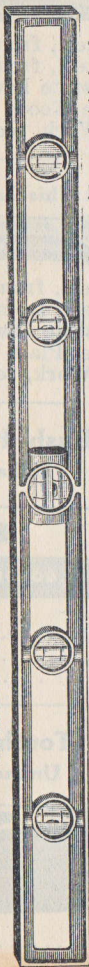

LEVEL COVER OR CASE—Protect Your Plumb Rule.

Made of best quality brown color canvas. Has leather corners, and altogether made for hard and long wear. Well worth the money you spend on one if you take a pride in the looks and condition of your Level. These Level Covers will fit any four-foot Plumb Rule or any Plumb Rule of shorter length. Will fit either wood or aluminum Levels.

No. 6—Without Handle, price each.....	75c
No. 8—With Handle, price each.....	\$1.00

Masons' Levels or Plumb Rules—Aluminum

No. 45—This Rule is made of aluminum, is 45 inches long, 3 inches wide and 1 1/2 inches thick. Weight 4 1/2 pounds. Has four plumbs and two levels. Plumbs or levels either end or edge up.

Price delivered to your door.....\$6.50
The vials in all our aluminum Levels are set the same way as in our wood Levels, covered by plate glass on both sides protecting them and making these important parts dust, dirt and waterproof. The great advantages in our wood and aluminum Plumb Rules over all others is that they are of double construction. No matter how they are picked up they are always in position for use, while the duplicate plumb glasses, one at the top, and the other just below the center, both reading the same way, add to its convenience. For low work, upper plumb glass is read, and for overhead work the low glass is in range. The most popular Levels made.

We guarantee safe delivery of all Tools purchased of us.

When buying tools of us please take into consideration
high quality, low price, honest dealing.

Masons' Levels or Plumb Rules—Wood

Remember: We deliver to your door free of charge at these extremely low prices.

No. 1A. This Rule, made of white pine, is 4 feet long, 3 inches wide and $1\frac{1}{4}$ inches thick. Has a hand-hole and bob-hole. Has two plumbs and two levels. Levels either edge up. Price, delivered at your door, \$2.40.

No. 3A. This Rule is made of white pine, is 4 feet long, 3 inches wide, and $1\frac{1}{4}$ inches thick. It has 4 plumbs and 2 levels. Plumbs or levels either end or edge up, and has two hand-holes. It is a narrow, light and very neat plumb rule. You cannot buy a better plumb rule at any price. Guaranteed to be on the dot. Price, delivered to your door, \$3.00.

No. 7. This rule is same size as the No. 3, and made exactly the same as the No. 3. But it is brass bound around all edges and corners. Price, delivered to your door, \$5.00.

The vials in all our Plumb Rules are protected by glass sides not allowing any mortar or dirt to accumulate about them.

We do business open and above board with everybody

Brick Layers' Brush

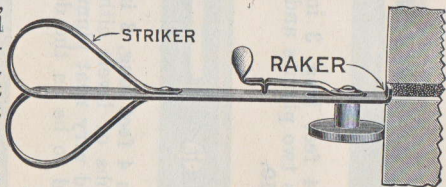

This Brush is used for brushing joints after they have been struck up with jointer. It is made of horse hair and Tampico mixed. The whole Brush is 14 inches long. Brush part is 8 inches long.

No. 720—Price. 35c

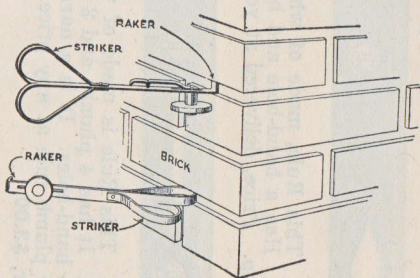

Bricklayers' Combination Joint Raker

This Raker, Jointer and Striker combined makes a smooth, perfect raked out joint. The most accurate tool of its

kind on the market. There are no screws or nuts to work loose. The revolving wheel prevents wear and will not mar the work or cause irregular depths in joints as where other rakers are used. The wheel revolving against the brick makes it easier for the mechanic to handle the tool.

The handle of the Raker forms two Strikers which will clean out any mortar that may collect.

To adjust the Raker, swing the lever to the side and move the wheel back or

forward to the depth desired, then swing the lever back in place and the wheel is positively locked in place. This Raker is made of a special grade of steel, thoroughly tempered, making it a first-class tool in every respect. Highly recommended by leading architects and mechanics.

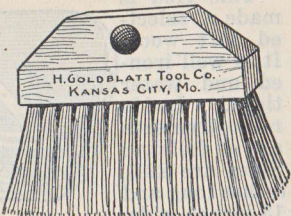

MADE IN TWO SIZES

Wood Mortar Hods

This Hod is made of select-
ed soft wood.
It is well iron-
ed and water
tight. Inside
measurements
are as follows:
Sides are 22 $\frac{3}{4}$
inches long and
13 inches wide.

Width across
the top is 15 inches. Our Hods are balanced in such a
manner that makes them easier to carry than the aver-
age hod, and they are demanded by hod carriers every-
where. Please do not compare our Hod with the ordi-
nary cheap flimsy hod usually seen in department stores,
because our hod is worth three of the cheap ones, and
will outlast a half dozen of the imitations.

No. 100—Price each, by express (not prepaid) . . . \$2.25

Length of handle is 4 feet.

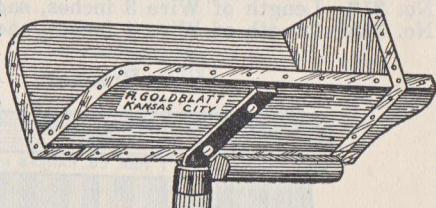

Wood Brick Hods

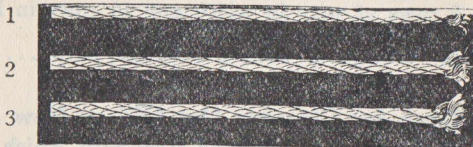

Our wood
Brick - Hod is
made of select-
ed soft wood,
well ironed and
otherwise the
same as the
Mortar-Hod in
general work-
manship. In-

side measurements are as follows: Sides are 20 $\frac{1}{4}$ inches
long and 7 inches wide. Width across the top is 10 in.

U. S. and Canada

Some More of Our Handy Book Information

Amount of Mortar to Lay Brick

How often are you asked how much mortar it takes to lay a thousand brick? How often have you had to call up some mason-contractor and ask how much sand and cement and lime it took to lay a thousand brick and how many a man could lay in a day? The knowledge is something you ought to have. It is called for nearly every time you attempt to convince a prospective home builder that brick is really cheaper than frame construction, and ignorance of these seemingly vital points in your argument cannot fail to have its effect upon the customer. There is a good chance that some of those frame house builders would have built in brick, had you been able to give them the information at the time they asked for it. The following table is published by the Building Age, and has been found accurate by mason builders.

Joints $\frac{3}{8}$	require 8 cubic ft. of mortar to the 1,000 brick.
Joints $\frac{1}{4}$	require 10 cubic ft. of mortar to the 1,000 brick.
Joints $\frac{5}{8}$	require 12 cubic ft. of mortar to the 1,000 brick.
Joints $\frac{3}{8}$	require 15 cubic ft. of mortar to the 1,000 brick.
Joints $\frac{1}{2}$	require 18 cubic ft. of mortar to the 1,000 brick.
Joints $\frac{5}{8}$	require 22 cubic ft. of mortar to the 1,000 brick.
Joints $\frac{3}{4}$	require 26 cubic ft. of mortar to the 1,000 brick.

These figures apply to both common and face brick, spread joints.

To lay 1,000 brick in lime mortar, with proportions of one of lime to five of sand, and joints $\frac{3}{8}$ to $\frac{1}{2}$ inch will require:

3 bushels of quick lime, at 30c bushel.....	\$0.90
18 cubic feet sand, at \$1.50 cubic yard.....	1.00

\$1.90

To lay 1,000 brick in Portland cement mortar, in proportion of one of cement to about three and one-half of sand, and joints $\frac{3}{8}$ to $\frac{1}{2}$ inch, will require:

1 $\frac{1}{4}$ barrels (five sacks) of cement, at \$2.00 barrel...	\$2.50
18 cubic feet sand, at \$1.50 cubic yard.....	1.00

\$3.50

These proportions are fairly extreme, the first being "poorer" than required by the building codes of some cities, and the second "richer" than is required for any but the most exposed work. The prices given on lime, sand and cement are, of course, given as a basis for comparison.

As for the number of brick a "good mechanic" (meaning a bricklayer who lays steadily and works in a fairly fast gang) can lay in a day is, as General Hancock said about the tariff, "a local issue." In a city where bricklayers' wages range from 65c to 75c an hour, common brickwork is laid for from \$5.00 to \$7.00 per thousand, depending upon the construction and thickness of the walls. Face brick costs from \$15 to \$25 per thousand to lay, depending upon the number of openings and the general construction. These prices include hod carriers' and mortar-mixers' wages, which are about half those paid the bricklayers.

Canada, United States, South Africa or Europe, they all seem near to Kansas City, because we ship everywhere

Steel Measuring Tapes

The Midget

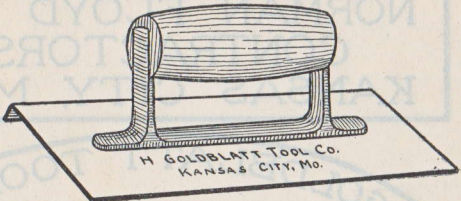

This Tape is 1/4 inch wide, in a stout leather case, long folding handle, center adjustable for hard wear, and trimmings are nickel plated. The diameter (outside) is

2 7/8 inches. On account of the small size, the tape can be carried in pocket with comfort.

Feet are divided into 12ths; inches into 16ths.	
No.	7362T
Length.	50 feet
Price.	\$3.00

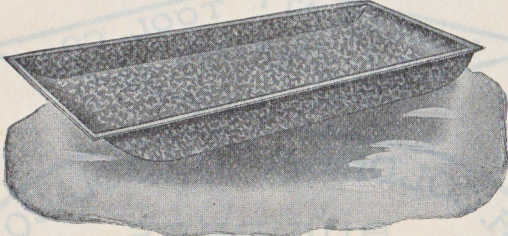

Sidewalk or Base Edger

This Edger is made of trowel steel; has a heavy mounting. It is a very popular tool for cement base on interior work. We carry the following size in stock—other sizes made to order: Size is 11 inches long, 5 inches wide, and side or edge is 1/2-inch deep. 3/8-inch radius.

No. C100C—Price	\$1.50
---------------------------	--------

Galvanized Steel Mortar Box

This is a great improvement over the wooden mortar box; does not leak and has no rough edges to catch the hoe while mixing mortar. This box is easy to handle and can be readily placed on a wagon and moved from job to job. No tile layer, plasterer, mason or contractor should be without one. Made of No. 16 gauge galvanized steel with 1 1/2-inch angle iron around the top. Shipped by express or freight (not, prepaid).

Prices of Name Stamps

Prices on Stamps, shown on opposite page, given below. These prices are for Stamps containing 25 letters or less. If Stamp you desire contains more than 25 letters add to the original price per additional letter as below:

		Additional Letters
½-inch Letters—Price, per Stamp....	\$2.50....	7c
⅝-inch Letters—Price, per Stamp....	3.25....	8c
¾-inch Letters—Price, per Stamp....	4.00....	13c
1-inch Letters—Price, per Stamp....	4.50....	15c

When ordering stamps, be sure to send exact sketch of what you want and state what size letters you want used.

All our Stamps are made of bronze.

Useful Information

One barrel cement contains $3\frac{3}{4}$ cubic feet.

One cubic yard of cement contains $7\frac{1}{4}$ barrels.

One cubic yard of sand and $3\frac{5}{8}$ barrels of cement will give a one to two mixture of cement and sand.

One cubic yard of sand and gravel and $1\frac{1}{2}$ barrels of cement will give a one to five concrete mixture.

A concrete block 8x8x16 inches is the equivalent of fourteen brick.

27.68 cubic inches of distilled water weighs 1 pound.

A cubic foot contains 7.4805 gallons at 60 degrees Fahrenheit.

Cement one bushel and sand two bushels will cover $3\frac{1}{2}$ square yards one inch thick, $4\frac{1}{2}$ square yards $\frac{3}{4}$ inch thick or $6\frac{3}{4}$ square yards $\frac{1}{2}$ inch thick.

One barrel of Portland cement equals four bags, and weighs 380 pounds.

A cubic foot of crushed stone, well shaken down, weighs about 100 pounds.

A cubic foot of cinder concrete averages 110 pounds.

A cubic foot conglomerate concrete averages 150 pounds.

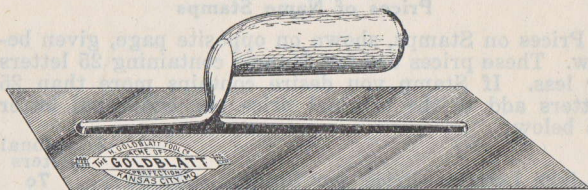

Loose, unrammed concrete weighs from 5 per cent to 25 per cent less than when well tamped.

TROWELS CAN BE FOUND ON PAGES 2 AND 3

You should read our Handy Book Information on other pages of this catalog

Plasterers' Trowels

The Goldblatt

No. 1G—Finishing Trowel, made of 24-gauge **best trowel steel**, highly polished and etched; mounting extends within one inch of each end of blade and contains **ten large rivets**. This leaves plenty of spring for finishing, also prevents lime from working between blade and mounting. Our Handles are shaped so as to fit your hand, and the Trowel is balanced so as to please the most particular mechanic.

Made in the following sizes: 11 inches, 11½ inches, 12 inches.

Price each, any size.....\$2.00

We are the originators of this pattern of Plastering Trowel. Every good Plasterer uses the Goldblatt Trowel.

No. 2G—Browning Trowel, for rough coating, made of 22-gauge **best trowel steel**, highly polished and etched; mounting extends within a half inch of each end of blade, and contains **twelve large rivets**. Otherwise the same as No. 1G.

Made in same sizes as the No. 1G.

Price each, any size.....\$2.00

Paola, Kan., Oct. 16th, 1913.

H. Goldblatt Tool Co., Kansas City, Mo.

Dear Sirs: Enclosed find \$4.10, for which please send me the Tools mentioned on enclosed order. Be sure you send a Goldblatt Trowel and no other kind. I have a Goldblatt Trowel that I have used for two years almost every day, has worn to less than four inches wide, but it is still as straight and true as the day I got it.

Yours truly,

204 Towers St.

FRANK D. YEATER.

Streator, Ill., Nov. 20th, 1913.

H. Goldblatt Tool Co., Kansas City, Mo.

Dear Sirs: Received the two dozen rolls of Finger Tape ordered the other day, and take pleasure in advising you that the other boys and myself just think it's the best stuff on the market. Wishing you success, I am,

Very truly,

H. J. FRENCH.

1313 Wisconsin St.

Hillsboro, Tex., 6/17th/1913.

H. Goldblatt Tool Co., Kansas City, Mo.

Gentlemen: Enclosed find order for some Tools; also money order covering the cost of them as per your catalog prices. One of the Brick Hammers and one of the Sets which I am ordering are for another bricklayer; the balance of the order is for my own use.

I am always pleased to recommend your Tools to my fellow craftsmen, as I have always found them to be the very best, and, above all, I admire your firm for its quick shipments, as I only have to wait a day or two for delivery. I will order some more tools very shortly.

Respectfully,

W. W. BENNETT.

109 S. Church St.

Minster, Ohio, July 26th, 1913.

H. Goldblatt Tool Co., Kansas City, Mo.

Dear Sirs: Please send me the following list of Tools, for which I enclose \$7.00 in payment. It is really a pleasure for me to use your Tools.

Yours truly,

J. B. VANDERHORST.

Toronto, Ont., Canada, March 3, 1913.

H. Goldblatt Tool Co., Kansas City, Mo.

Dear Sirs: I wish to acknowledge receipt of Tools I ordered from you a few days ago. I am perfectly satisfied with the Tools, as well as the manner in which you have handled my order. I also am glad to say that I had absolutely no red tape to go through when the goods arrived.

Yours truly,

GEO. T. EVANS.

120 Yorkville Ave.

Our RESPONSIBILITY is beyond question

Be sure to read every page of this catalog

Bricklayers' Finger Tape

This is the same tape as we illustrate on page 26 of this catalog. This picture shows how each roll is put up in a paper box.

The drug stores charge 50c to 75c a roll for the same kind of tape and they do not give you as large a roll as ours, not one-half as large. Just think how cheap you can buy it of us.

This tape is used by bricklayers and masons to wrap around their fingers, protecting them from getting sore. The Tape is a white color, $1\frac{1}{4}$ inches wide; each roll weighs 6 ounces. Every roll comes wrapped in tinfoil and pasteboard box, which keeps the Tape fresh and in good condition. Don't compare our Tape with ordinary cheap electrical Tape, which is commonly sold as Bricklayers' Tape. Our Tape is made purposely for bricklayers' use, and is very adhesive. We guarantee it to stick on your fingers.

PAPERHANGERS' TOOLS

On the following pages we show a large and complete line of Paperhangers' Tools. Every Tool is illustrated and described in the best way we know how. Prices are extremely low. It's the large volume of our goods that we sell enables us to quote these very **LOW PRICES**.

Take notice of our large and complete line of other Tools on previous pages of this catalog which are also quoted at very low prices.

Paperhangers' Cold Water Dry Paste

No Smell. No Vermin. No Waste.

Dissolves immediately in cold water. Makes a transparent and snow white paste. Can be made to any consistency by

adding more water or more dry paste. It is very adhesive, convenient, saves time, is mixed at the job and ready for immediate use. Warranted chemically pure, will never sour, and will hang any kind of wall paper.

2½-lb. package (shipping wt. 3 lbs.)	\$0.25
25-lb. pail (shipping wt. 30 lbs.)	1.75
100-lb. sack (shipping wt. 117 lbs.)	6.00

One 2½-lb. package will make a large pail of paste ready to use.

Paperhangers' Prepared Wet Paste

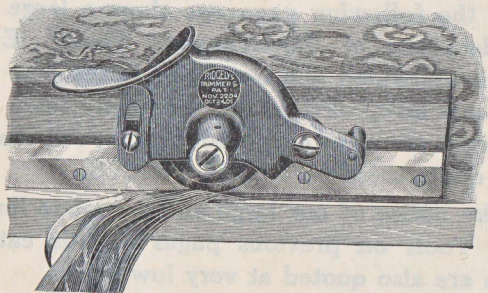

Best on the market, always the same uniform consistency. It is perfectly smooth and white; it spreads evenly; dries without discoloration. Always ready for immediate use.

50 lbs.—wooden pail	\$0.85
150 lbs.—½ barrel	1.75
235 lbs.—1 barrel	2.60

All Paste sold F. O. B. Kansas City.

We are situated in the heart of America. We ship Tools to all parts of the United States and Canada.

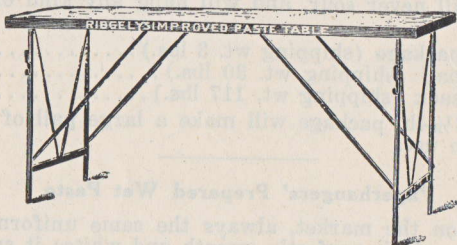

Ridgely's Improved Trimmer

The new frictionless model D will cut heavier goods with less weight than any trimmer made. It is the easiest handled, and less complicated than any other trimmer. The trimmers are nickel plated; the straight edge is made of the best seasoned lumber and brass bound on both edges; the front edge having an angle brass, protecting the edge from warping both ways.

Complete, 6 ft. Straight Edge, Knife and 3-inch Zinc.	Each \$4.25

Paper Hangers' Cutting Out Knife.

The most effective tool for cutting out crowns, borders, etc., that has yet been invented.

Handles, polished ebonized wood; cap and setting band, polished steel. New blades inserted by a turn of the wrist.

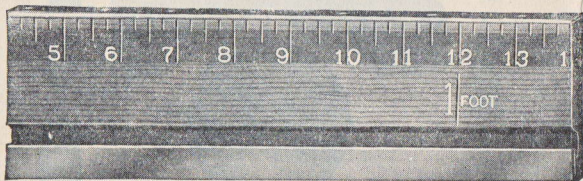

Price, complete, each. \$0.40
Price, extra knives, each.20

Goods shipped same day order is received.

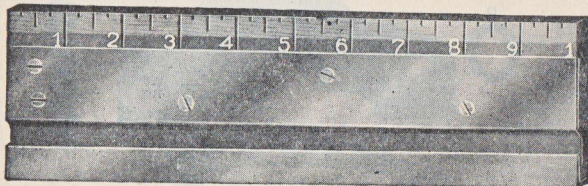

Straightedges.

All our Straightedges are 3 inches wide by $\frac{1}{2}$ inch thick, made of the very best white pine and California Red Wood. (Notice, Red Wood, not Red Birch, a much cheaper and inferior wood) air dried (not kiln dried, a much cheaper way to cure lumber), built up in five sections alternately, with grain reversed in each section, 3 coats of shellac, all brass set with screws.

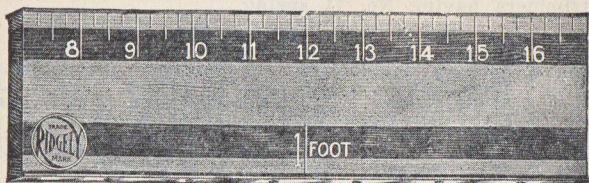

We can find nothing to equal them and recommend them to you as the best made.

No. 6. Maple Bound Knife Edge.
Price, each 7 ft. only, \$1.15

Folding Trestles. With Improvements.

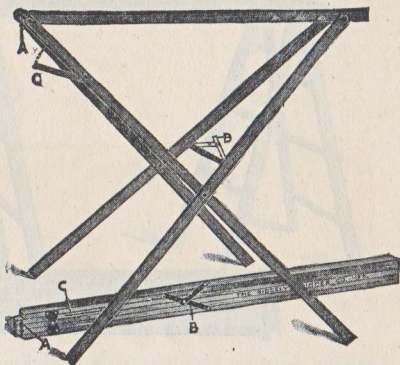

No. 2 — An entirely new design, excellently constructed of hard maple, and adjustable to various heights from 30 inches to 34½ inches without using pins, and without disturbing the level top. At "A" are steel clips between each piece of wood to prevent paste from rotting it.

"B" is a break joint spreader for convenience and extra strength, which you simply push up and down to tighten or loosen.

"C" is the hook for holding the straightedge, which slides into recess when not in use, as shown in folded cut, and is never in the way in carrying.

Marvel of carrying strength and folding simplicity.

Nickel plated trimmings, weight 4½ pounds per pair.
Price for Trestles, per pair.....\$1.10

Paste Board.

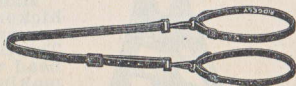

½-inch thick, 23 inches wide, 11½ inches when folded. Made with several boards, tongue grooved and glued with grains reversed to prevent warping.

Handy Shear Holder.

Just the thing for the paper hanger or decorator. A patented device that takes care of your shears and keeps them always ready to your hand. Never a moment's delay in bringing them into use or putting them back into the holder. No need of looking down while placing them into or removing them from the holder. You can't go wrong if you try. The wire guard is kept in position by a blued steel spring that yields to the swing of the shears, as you pass them into the loop. You remove the shears by lifting them upwards.

Price, each.40c

Shear Sharpener.

Take the Sharpener with the points of the Scissors, pass them very lightly over the Sharpener once, then try them. If once does not have the desired effect, repeat, trying them each time. They are fine. No. 654, each.....10c

Graining Combs.

Made of the best English blue steel, packed in tin, divided, cases, 12 combs in assorted sizes, to a set, equal to 30 inches, in 6, 9 and 12 teeth per inch. A good practical comb for general use. Per set.85c

We are known as the leaders in Plasterers', Masons' and Paper Hangers' Tools, and we are that

Flexible Grainer.

A set of 5 Ridgely Flexible Grainers will produce perfect imitations of all grained woods in less time than has ever before been possible.

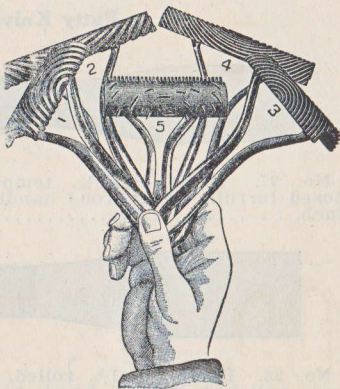

With the flexible Grainer heart work or quartered oak can be produced just as readily as straight grain.

Nos. 1 and 2 are used for producing large effects, such as Walnut and Mahogany.

Nos. 3 and 4 produce open and heart grains.

No. 5 produces Quartered Oak grain and has attached to it the Comb or Blender.

No. 00. Per set....\$2.25

Davis Patent Grainer.

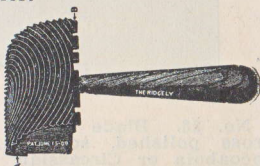

A set of Grainers consisting of three rolls, made of the best rubber, 5 inches long and 1½ inches in diameter. The corrugated roll imitates any known growth of wood. The other vein roller reproduces quarter sawed oak grain. The roller comb, with three different sizes of combs, is especially valuable as an adjunct to the veining rollers to be used in connection with them in the graining of plain woods, as in stiles and rails. Therefore, one will be prepared to do any kind of oak, ash, chestnut, etc., graining without the use of any other tools.

Per set of 3 Rollers.....\$1.00

Hand Grainer.

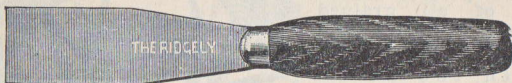

No. 10. Corrugations are fine and produce some beautiful effects. With the comb and quarter-sawed feature connected with this grainer makes it an excellent seller, and a valuable tool for the mechanic.

Price. Each.....40c

Ladder Jack and Scaffold Support.

For Painters, Tanners and Building Trades.

The above cut shows the distinctive feature of the Ridgely Bracket—it can be reversed and attached so that the top rung of the ladder can be used. This feature is not found in any other bracket made.

It is always perfectly rigid, yet is instantly and easily adjustable to any desired position. Works equally well right side up or upside down, and is absolutely safe in any position—only the highest

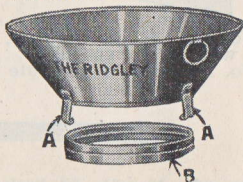

grade of steel is used and perfect workmanship is insured by rigid inspection.

No. 600. Price, per pair (not prepaid).....\$2.15

Paint or Kalsomine Strainer.

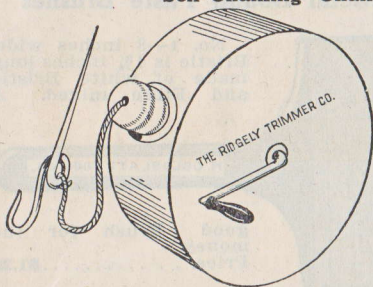

No. 473. Made of the best heavy tin. Place your gauze wire or cloth over Ring "B." Set the top down and clamps "A" hold it securely, easy to clean, easy to replace new straining material. Shipped with fine brass gauze wire.

Price. Each.....60c

Self-Chalking Chalk Line.

Reel holds 36 feet of line, and chalk enough to last for years. Can't get out of order.

3 inches in diameter, 1 inch thick, weighs 4 oz.

Always ready; stick the awl in wall, draw the line and snap.

No. 444. Each....65c

Chalk Line Holder.

Will hold easily a 50-foot line. Fasten end of line to the steel pin on handle; always ready for use, requiring no driving of nails or helper. When not in use the steel pin and handle sinks in end of spool. Perfect satisfaction.

No. 688. Each!.....20c

Chalk.

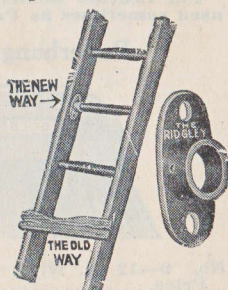

No. 689. Red or blue color.
Per dozen cones.....10c

Repair Ladder Rung Replacer.

A device manufactured from Cold Rolled Steel for replacing broken rungs in ladders. It is the only invention ever placed on the market for this purpose. Invented by a practical painter who felt the need of such an appliance. Neat, strong, light and durable.

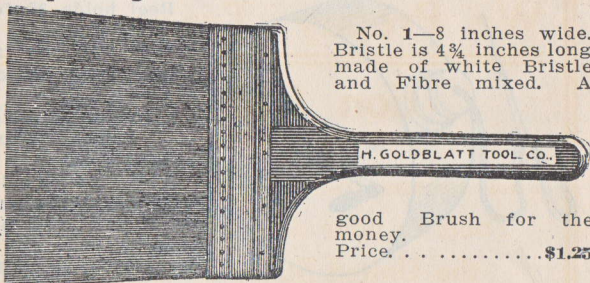

Each.10c

Per dozen.75c

Our prices are always the lowest. It's the large volume of Tools that we sell enables us to do this.
